How Many to 100? Student Solutions Kelly and Gina

"We didn't use a 100 grid. We added 2 to get to 30. Then we added 20 to get to 50. We know that 50 plus 50 is 100, so we added 50 more to get to 100. We wrote 28+2=30, 30+20=50, and 50+50=100. We added 2+20+50 together, so she needs 72 more stickers."
