

Student E

374 ÷ 12 = I know 12 × 5 = 60
another 12 × 5 = 60 another 12 × 5 =
60 and 60 × 3 = 180 You know you
have 15 12's. 180 + 180 = 360
another 15 12's = 30 12's
and one more 12 so 31.2

This is not correct. What can you infer that the student understands?
