

How Many to 100? Student Solutions

Kelly and Gina

“We didn’t use a 100 grid. We added 2 to get to 30. Then we added 20 to get to 50. We know that 50 plus 50 is 100, so we added 50 more to get to 100. We wrote $28+2=30$, $30+20=50$, and $50+50=100$. We added $2+20+50$ together, so she needs 72 more stickers.”
